

record appointed partner for McDonald's in North of England & Northern Ireland

McDonald's has been operating in the UK for over 40 years and has contributed £40bn to the UK economy and supported countless suppliers, employees and communities. As part of a national refurbishment programme, record became the appointed partner for McDonald's in 2016 as the supplier of all new automatic doors throughout the North of England and Northern Ireland.

Provider of Planned Preventative Maintenance

The strength in this partnership, due to the highest quality standards for installations and project management, has subsequently developed to engage record as the provider of all Planned Preventative Maintenance, reactive servicing and extended warranty support across 171 leading McDonald's restaurants.

Offering a true 365 and 24/7 network of national support, record ensures that all restaurants benefit from critical attendance whenever required, which is vital to the ongoing operation of all automatic doors across this household name of dining establishments. All maintenance is carried out by fully trained BS7036/EN16005 Service Engineers in line with a mandated scope of works to support critical Health and Safety requirements at all times.

With an ongoing programme of refurbishments and upgrades, record is proud to continue this journey with McDonald's to ensure a market-leading service for many years to come!
