

record contracted service provider for Storage King

Case Study

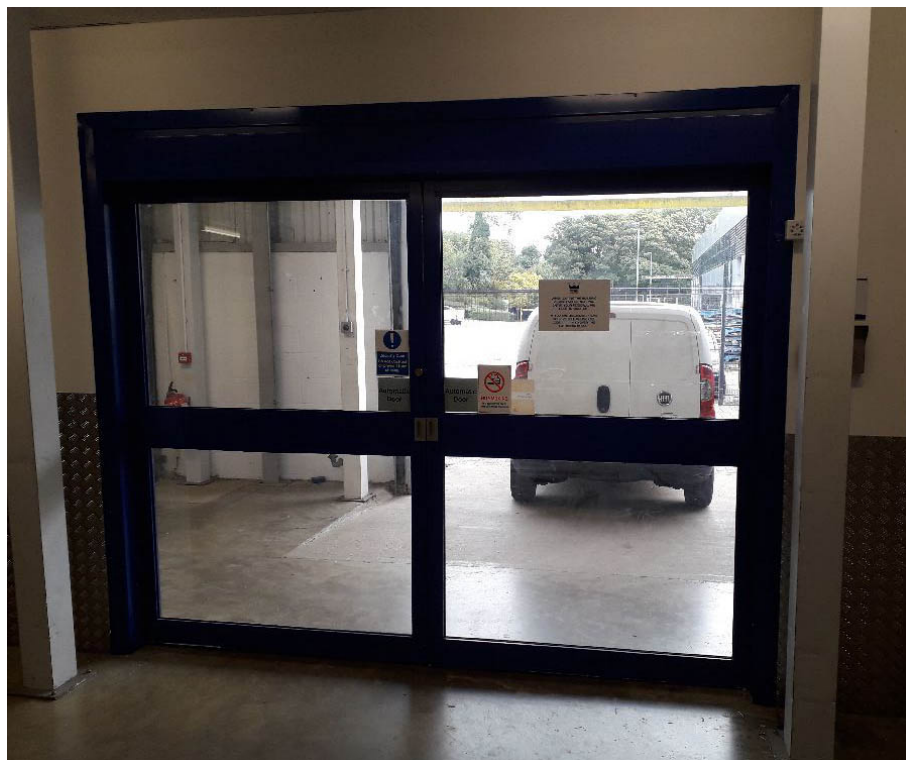

record is proud to be the contracted provider of PPM and reactive servicing to the automatic doors across all UK Storage King sites. Operating out of 26 locations across the UK, Storage King offers a range of services for their customers across personal, business and student storage solutions.

With a continually high level of pedestrian traffic in their busy stores, ensuring the automatic doors continually operate to optimum standards is key to maximising their business. Emma Chesterton-Kay, Acquisitions and Development Manager for Storage King, gave testament to our service levels, stating “the service from record has been exceptional - by far the best sliding door company we have come across!”.
