

# Britannia House - Bradford

## Brief

Bradford Metropolitan Council wanted to modernise their staff and visitor entrance, increase security, and prevent tailgating, without hindering the speed of entrance or accessibility.

## Solution

Record installed **2 x Record Vision Touch Speed Gates** (650mm wide) to handle high traffic effectively and eliminate tailgating, and **1 x 915mm DDA Compliant Record Vision Touch Speed Gate** to ensure accessibility for all, including those with disabilities. Glass infills were also included to provide a modern aesthetic while maintaining visibility and security.

## Result

The new entrance is welcoming and sophisticated and has transformed the reception area, offering enhanced security and efficiency.

D.K., Electrical Surveyor commented "The entire process, from sales to installation, went smoothly. The team provided excellent advice to find a suitable solution within our budget".

He added "We chose Record for their reliability, quality products, and service backup. We are extremely satisfied with the outcome and we would recommend Record to anyone. We will definitely use them again in the future".
