

# Pentagon Centre

## Brief

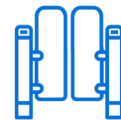

Create secure access for an office building that offers flexible workspaces in the heart of Glasgow's financial sector.

## Solution

Installed 2 x Record Vision Touch speed gates that both compliments the buildings aesthetics and ensure visitors have peace of mind knowing the areas is safe from intruders.

## Result

This office building can ensure that those entering have permission to do so and are now able to reallocate staff who no longer need to authenticate visitors' identities.

The modular design of these speed gates means they are quick & easy to install and require minimal maintenance.

Sophisticated sensors prevent breaches such as intrusion, tailgating, wrong way detection and leave aisle timeout.

Various methods of authentication are available including card readers, QR codes and biometrics.
